

CUTTING LEYS

RACHEL LUCERNE

2-5 year high protein
8-10kg/acre

Rachel is a newly bred variety of Lucerne out of northern France. It has considerable better leaf retention after cutting with softer stems producing 12 tonne dry matter per hectare in 3 – 4 cuts. 18 – 20% protein, the perfect match for maize.

EXPRESS HIGH PROTEIN

2.00 kg Lemmon red clover
1.00 kg Merviot broad red clover
3.00 kg Barsilo hybrid dip ryegrass
3.00 kg Drumlin hybrid tet ryegrass
2.00 kg Foyl intermediate hybrid tetraploid ryegrass
12.00 kg/acre

This mixture has been designed to be compatible with high starch maize silage. Gives 3 full years of high silage yields utilising maximum red clover for high protein content. This mixture is superb for finishing lambs and or fertility builder in an arable rotation.

HIGH D LONG TERM GRAZING

3.00kgs Corbet intermediate diploid perennial
2.00kgs Dunluce intermediate tetraploid perennial
3.00kgs Portrush late diploid perennial
2.30kgs Delphin late tetraploid perennial
2.00kgs Ideal late tetraploid perennial
0.30kgs Barlanca large white clover
0.40kgs Crusader medium white clover
13.0kgs/acre

Long term persistent grazing mixture available with or without clover. Fast establishment producing extensive palatable growth late into the grazing season.

BARMIX

DRY LAND &
LOW INPUT

7% Barmoral cocksfoot
7% Comer timothy
43% Barolex tall fescue
14% Foyle tet hybrid ryegrass
22% Portrush late dip perennial ryegrass
7% Ensign white clover blend
100% @ 14 kg/acre

Long term persistent grazing mixture available with or without clover. Fast establishment producing extensive palatable growth late into the grazing season.

HORSE Paddock MIX

2.00kg Strong creeping red fescue
2.50kg Glen int perennial ryegrass
2.00kg Premium perennial ryegrass
2.00kg Jumbo late perennial ryegrass
1.50kg Tall fescue
1.00kg Erecta timothy
1.00kg Meadow fescue
12.0kgs/acre

Excellent multipurpose grazing and hay paddock mix. Self-repairing after poaching with persistent grasses that are not too rich. Also suitable for production of course hay.

ORGANIC

We are able to offer mixtures to suit all situations with red or white clover. All mixtures conform to the minimum demands of organic regulation authorities.

GRASS MIXTURE range

BROUGHT
TO YOU BY
the experts

HIGH SUGAR “ABER” GRASSES AND CLOVER BLENDS

The Aber grasses and clovers have been developed considerably over the last 15 years, and now boast varieties topping the NIAB list. Bred at IBER Aberystwyth for yield, disease resistance, digestibility and palatability, these varieties are included throughout the Bright Seeds range.

“ABER” HYBRID RYEGRASS

The yields of an Italian ryegrass combined with the longevity of a perennial ryegrass and now with High Sugar content, makes Aber Hybrids an invaluable component in cutting mixtures.

CUSTOMER SPECIAL MIXTURES

Many customers have mixtures made suited to their own specific needs, whether it be to suit soil type or management regime. We have a wide range of varieties available to make up “customer specials”.

Our mixtures contain (wherever possible), HVS seed and varieties on the current NIAB recommended list.

MULTIPURPOSE CUTTING AND GRAZING

CASTLE CUT AND GRAZE 2 – 4 YEAR

- 2.00kg AberDart intermediate diploid perennial ryegrass
 - 2.00kg AberMagic intermediate diploid perennial ryegrass
 - 3.00kg AberChoice late diploid perennial ryegrass
 - 3.00kg AberEve tetraploid hybrid ryegrass
 - 3.25kg AberEcho tetraploid hybrid ryegrass
 - 0.75kg AberConcord medium white clover
- 14kg/acre**

With this mixture including exclusively the outstanding AberHSG grasses, Castle Cut and Graze will deliver excellent animal performance in both environments. The class leading digestibilities and sugar contents of the grasses will deliver outstanding animal output. Designed to give excellent sward growth throughout the season.

PLENTIFUL 3 – 5 YEAR

- 2.00kg AberAvon late diploid perennial ryegrass
 - 2.00kg AberChoice late diploid perennial ryegrass
 - 2.00kg AberGreen intermediate diploid perennial ryegrass
 - 3.25kg AberMagic intermediate diploid perennial ryegrass
 - 2.00kg AberEcho tetraploid hybrid ryegrass
 - 2.00kg AberEve tetraploid hybrid ryegrass
 - 0.75kg AberDairy white clover blend
- 14kg /acre**

A medium term mixture, Plentiful will continue to deliver over the duration of its life. With its higher inclusion of AberHSG perennials it provides greater durability than the Castle mix, with a lean towards the grazing environment. The high sugar content and high digestibility continue to deliver proven animal performance advantages.

LONG TERM MIXTURE

BOUNTIFUL GRAZING AND HAY

- 2.75kg Aston Energy intermediate tetraploid perennial ryegrass
 - 3.00kg AberGreen intermediate diploid perennial ryegrass
 - 3.00kg AberAvon late diploid perennial ryegrass
 - 3.00kg AberChoice intermediate diploid perennial ryegrass
 - 1.00kg Presto early timothy
 - 0.75kg AberPasture white clover blend
- 13.5kg/acre**

A long term grazing mixture, Bountiful is selected from some of the highest digestible varieties available for grazing, and will deliver throughout the season with its excellent growth characteristics. The inclusion of timothy will help extend the grazing season, with the AberHSG grasses continuing to promote class leading milk and meat production.

BOUNTIFUL SHEEP GRAZER

- 3.75kg AberAvon late diploid perennial ryegrass
 - 4.00kg AberChoice late diploid perennial ryegrass
 - 2.50kg AberGreen intermediate diploid perennial ryegrass
 - 2.50kg AberStar intermediate diploid perennial ryegrass
 - 0.50kg AberSheep white clover blend
 - 0.50kg Puna II forage chicory
 - 0.25kg Tonic forage plantain
- 14kg/acre**

Designed specifically for intensive sheep grazing, Bountiful Sheep Grazer will promote excellent lamb growth rates. The combination of AberHSG grasses will excel both in the sward, and in terms of animal production and being all diploid grasses this will add durability under heavy grazing regimes. The inclusion of deep rooted herbs will enhance digestibility, drought resistance, and provide anthelmintic properties further enhancing animal performance.

LONG TERM CUT AND GRAZING

- 2.00 kg Ideal late tet perennial ryegrass
 - 2.00 kg Fortstuart late dip perennial ryegrass
 - 4.00 kg Tyrella late dip perennial ryegrass
 - 2.50 kg Delphin late tet perennial ryegrass
 - 2.00 kg Corbet intermediate dip perennial ryegrass
 - 0.50 kg Crusader medium leaf white clover
 - 0.50 kg Barblanca large leaf white clover
- 13.50 kg/acre (available with no clover)**

Long term dual purpose ley giving the option of either cutting or grazing. The first cut around the middle of May will produce excellent yields of highly digestible silage. The very dense, palatable, clean sward also produces top quality grazing.
